

Radar Antenna Installation Guide

Thank You

Thank you for choosing Humminbird®, the #1 name in fishfinders. Humminbird® has built its reputation by designing and manufacturing top-quality, thoroughly reliable marine equipment. Genuine Humminbird® accessories offer the opportunity to upgrade and expand the capabilities of your Humminbird® product.

Contact our Customer Resource Center at **1-800-633-1468** or visit our Web site at **humminbird.com**.

Overview

Following are instructions for the installation of this accessory. Before you start installation, we encourage you to read these instructions carefully in order to get the full benefit from your Humminbird® accessory.

Installation

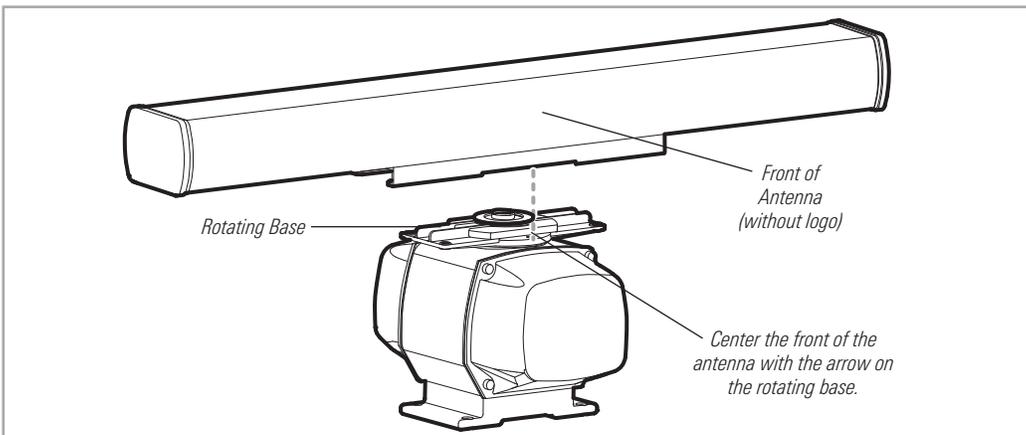

Use the following procedures to install the radar antenna onto the scanner unit.

1. Install the Scanner unit by following the instructions included with the equipment.
2. Remove the protection tape from the top of the rotating base.
3. Place the rubber backing (included) onto the center of the rotating base, and press down on it lightly to remove any wrinkles (Figure 1).

NOTE: Do not wipe off the grease from the rubber backing.

4. Locate the Humminbird® logo on the antenna. This is the back of the antenna (Figure 2).
5. Center the antenna onto the rotating base so that the **front** side of the antenna (without the logo) lines up with the arrow mark on the rotating base (Figure 3).

6. Apply the anti-electrical corrosion paste to the 4 included bolts (Figure 4).
7. Secure the antenna to the rotating base in all 4 locations using the included bolts, toothed washers, and plain washers (Figure 5).
